**DETAILED ACTION**

***Reasons for Allowance***

1. Claims 12-28 are allowed.
2. The following is an examiner's statement of reasons for allowance: the limitations "a single element spring arranged to seal the annular gap from the hot working medium having a first end... wherein a width of the circumferential groove is smaller than a width of the spring element first end to provide a secure and sole retention of the spring element in the circumferential groove due to an interference between the spring element first end and the circumferential groove" is not found or taught in any of the prior art of record. The closest prior arts of record Morgan US 6,464,457 and Frost US 6,164,656 do not disclose all elements where Morgan does not disclose a single element spring where the spring's first end is not in an engagement with the circumferential groove to provide a secure and sole retention of the spring element and Frost does not disclose the interference fit engagement between the spring element first end and the circumferential groove. One of ordinary skill in the art at the time of the invention would not have found it obvious to modify the seals of either Morgan or Frost to arrive at the claimed invention because there is no motivation to remove and replace the retention systems disclosed in Morgan and Frost.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
